

**LAPORAN PRAKTIKUM MEMBUAT DESAIN BASIS DATA
SEBAGAI MASTER TAHAP II**

Mata Kuliah : Basis Data
Dosen Pengampu : Gus Nanang Syaifudiin S.Kom.,M.Kom.
Nama Praktikan : Tio Fernando Tiras
Nim/Kelas : 243307089/1C
Tanggal Praktikum : 28 November 2024

**JURUSAN TEKNIK
PROGRAM STUDI TEKNOLOGI INFORMASI
POLITEKNIK NEGERI MADIUN
2024/2025**

1. Tambahkan binlog_do_db dan tambahkan nama databasenya

```
# Replication Master Server (default)
# binary logging is required for replication
# log-bin deactivated by default since XAMPP 1.4.11
log-bin=mysql-bin

# required unique id between 1 and 2^32 - 1
# defaults to 1 if master-host is not set
# but will not function as a master if omitted
server-id=1
binlog_do_db=db_coffeshop

# Replication Slave (comment out master section to use this)
#
# To configure this host as a replication slave, you can choose between
# two methods :
#
# 1) Use the CHANGE MASTER TO command (fully described in our manual) -
#    the syntax is:
#
#    CHANGE MASTER TO MASTER_HOST=<host>, MASTER_PORT=<port>,
#    MASTER_USER=<user>, MASTER_PASSWORD=<password> ;
#
```

2. Show master status untuk menampilkan binlog

```
MariaDB [(none)]> SHOW MASTER STATUS;
```

File	Position	Binlog_Do_DB	Binlog_Ignore_DB
mysql-bin.000003	514	db_coffeshop	

```
1 row in set (0.000 sec)
```
